ROTHENBERGER

Wuxi Shengda was originally established in 1991. It is one of the earliest, biggest and most famous butt fusion equipment manufacturers in China. We have become a wholly-owned subsidiary of the German ROTHENBERGER Group since 2016. 80,000 machines have been used in 85 countries in the area of water, gas, petro-chemical, mining, etc. to improve largely on the life of human beings.

Our company has been certified by SGS group from Switzerland for ISO9000 quality system and has also been certified by German TÜV organization for CE product compliance. These certifications have provided a reliable guarantee on the improvement of quality of our products.

Professional Manufacturer Of Plastic Pulverizer Machine

MF SERIES DISC TYPE PLASTIC PULVERIZER

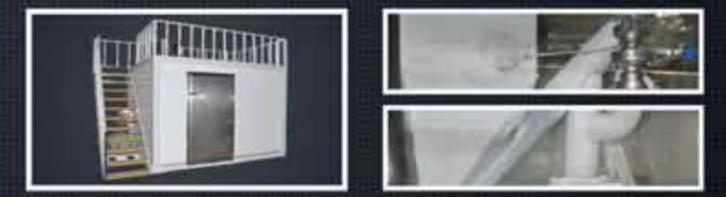

Application:
 Disc diameter ranges from 350mm to 800mm, is widely applied to grind PE, soft PVC, PP, PS, ABS, PA, EVA, PET, PC and so on.

Advantages:
 Low energy consumption and high throughput;
 Regrinding coarse powder automatically;
 Dual cooling system;
 Safe and simple adjustment of cutting gap

CRYOGENIC MILL MACHINE

Be used for various materials which can't be shattered in room temperature. The pulverized powder size can reach to 700 mesh. The cold medium temperature can be adjusted according to the brittleness point of material, and it can be cooled to -196°C at most.

INTEGRITY TESTIMONY,STRENGTH OPERATING

Dongguan Haibao is a factory specialize in Electrostatic plastics Separator and rubber separator. Electrostatic plastics separator is applied to separate the mixed plastics that cannot be separated by the density of the flotation process and available in separating mixed plastics such as ABS,PS,PP,PET,PVC,PA,PE,PO and so on. The rubber separator is used to separate rubber/silicone from plastics. Our separator is very popular in China plastic recycling field, more than 80% Plastic Electrostatic Separator in China is from our factory.

As you know, Chinese government is very strict on waste plastic importing now. Waste plastics must be separated and make into granules before coming into China. More and more people are going to other countries to built recycling factory. And many plastic suppliers from Europe and Japan are consulting separation line with us. Separator from Germany is so expensive and our separator is very popular because of its good features and good price. So it is a very good chance for us. We are looking for more buyers, agent and distributors. Welcome your cooperation.

www.butfusion.cn

WUXI SHENGDA PLASTIC PIPE WELDING MACHINE CO.LTD

Welcome to China.
Welcome to Shengda.
Shengda, we are leading the way!

■ About Us

Shengda was originally established in 1991. It is one of the earliest, biggest and most famous butt fusion equipment manufacturers in China. The company has also participated in the drafting of Chinese national standard for fusion welding machines.

Wuxi Shengda has been a member of ROTHENBERGER since 2016.

■ What We Do

We are so glad to tell you, 80k machines made by us have been running in more than 80 countries in near 30 years. They have made huge contributions to improve the human life in the area, such as water, agriculture, gas, oil, telecom and building constructions. We offer you full range of equipment to cut and weld and fabricate the plastic pipes

and fittings up to 3000mm. Those equipment sets consist of field connection, workshop fitting machines and all kinds of tools. We make manual, hydraulic and CNC machines.

People makes the changes, people makes growth. We are proud to have those excellent employees to support our growth in past 30 years. We continue to introduce the talents

to our R&D, manufacturing and other key functions. Those talents we introduce today have super working experience from successful international companies. Most of our employees have very good education background. More than 50% of them graduated from universities, and many of them hold master degrees.

■ Production Efficiency and Production Quality Assurance

Since we became a member of Rothenberger group, with the help from German team we have been improved largely on our manufacturing capabilities. We have introduced new production lines and new test equipment, e.g., a world-leading heat fusion machine production line. This manufacturing line was created by Rothenberger. It has integrated process manufacturing with online testing service, and it complies with the production standards required by numerous countries. This production line has functions like automatic detection as well as data record and analysis. It supports the manufacturing process and can also optimize production efficiency.

We have completely implemented an ERP system. The operation process has been greatly improved through the use of various modules regarding MRP, production schedule, inventory, etc.

■ Certifications

Our company has been certified by SGS group from Switzerland for ISO900 quality system and has also been certified by German TÜV organization for CE product compliance. These certifications have provided a reliable guarantee on the improvement of quality of our products.

■ Research & Innovation

We have become a wholly-owned subsidiary of the German ROTHENBERGER Group since 2016. ROTHENBERGER Group is a world-leading pipe tools and machine tools manufacturer. Product innovation enables us to grow in future, to develop and maintain product roadmap is the key measure of our KPIs. We have strong R&D team and we have very experienced customers and partners from this industry,

who are willing to work with us to develop new technologies. We are to be safer, more environmental friendly and more ergonomic to user. We own many patents and we plan to develop several patents every year. We will make ourselves very strong to be able to support our customers.

■ Sustainable Development

Culture safeguards our growth. We are creating a dynamic enterprise culture. We promote the culture of safety, quality, innovation, team work, respect, family ties and continuous improvement. Our team is fully equipped with energy, confidence and enthusiasm. We are looking forward to working together with all of you!

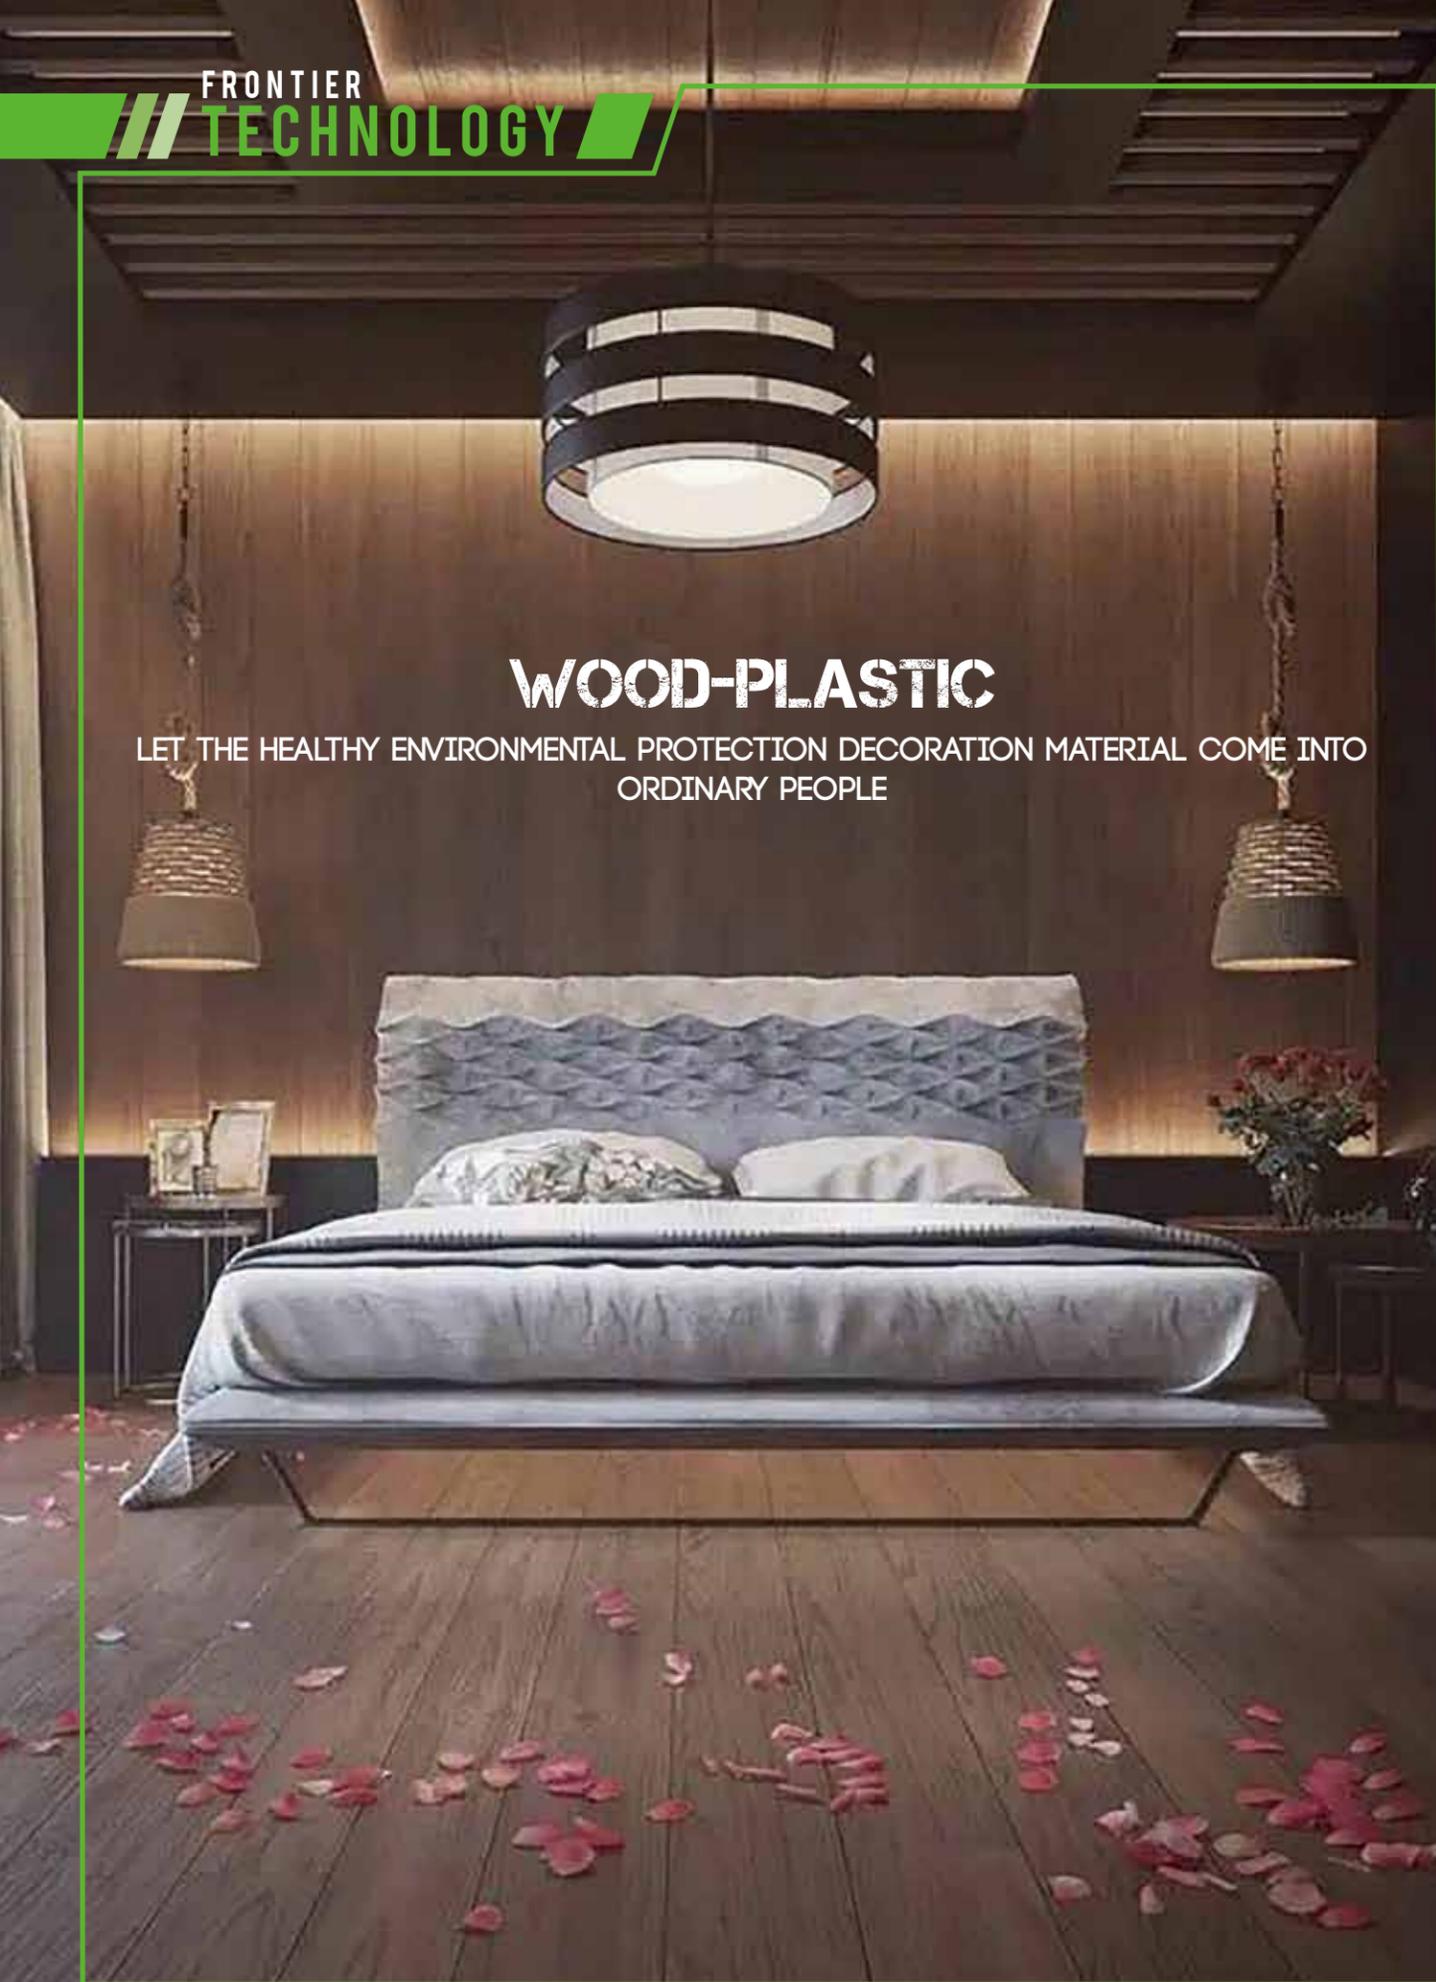

■ Our Mission & Vision

Our mission is to connect people with water, energy and safety. Our vision is to lead the technology and the evolution direction for plastic pipe welding industry.

WOOD-PLASTIC

LET THE HEALTHY ENVIRONMENTAL PROTECTION DECORATION MATERIAL COME INTO ORDINARY PEOPLE

OLDUPC

Wonderful WPC Products

Merged into Natural, gather inspiration, super wood feeling, fresh and natural, meet the desire of urban population return to natural;

Hope beautiful wood-plastic products, reach every place in the world!

From 1999, Wuhan OLD began to focus on the research and development of green wood plastic decorative material extrusion equipment and technology of wood plastic processing, after years of hard study, by professional wood plastic technology and equipment, created many top honors in the field of wood plastic applications.

By the China association of resources comprehensive utilization of wood plastic composite materials professional committee recommended, the examination and approval of China's national development and reform commission: Wuhan OLD WPC Industrial Co., Ltd. producing the full range of wood plastic composite extrusion machine has topped 'the current catalogue of 2007 the state encourages the development of environmental protection industry equipment'

OLD products are now widely used in home decoration, company decoration and so on various occasions, such as indoor and outdoor wall, floor, indoor suspended ceiling, outdoor gallery road, indoor acoustic board, partition, billboards, etc.

Wuhan OLD WPC Industrial Co., Ltd. can supply wood plastic production technology process, there are two ways for client to choose:

- Supply ready wood plastic granule to the client, they can directly producing the wood plastic products which have Solid wood taste.
- Supply manufacturing technical formula, client buy the raw material by themselves, then mixing and granulating, producing by themselves.

Two series of the company equipment:

- MS-107 Wood plastic Parallel twin-screw extrusion granulating machine
Characteristic: Small energy consumption, high output, uniform granule, is the ideal wood plastic granule extrusion equipment.
- MS-75-150 Wood plastic single screw extruder production line
Characteristic: Power saving, texture clear, can rival with real wood

Zhangjiagang Huibang Machinery Co., Ltd is the Professional Manufacturer, Exporter & Solution Provider in plastic grinding industry. Founded in 2006, we keep providing top products to customers. Up to now, our machinery has been sold out to 80 countries, more than 2,000 sets of pulverizer works in China mainland.

In view of the characteristics of plastic material, we developed different models to meet the needs of customers. Our main products including: SMW series turbo type pulverizer machine, MF series disc type pulverizer machine, Cryogenic grinder machine and so on.

Zhangjiagang Huibang Machinery Co., Ltd is located in Zhangjiagang city, near to Shanghai. The excellent quality, superior performance, competitive price and permanent after-sale service is our consistent commitment and lifetime pursuit.

■ **SMW SERIES TURBO TYPE PULVERIZER MACHINE**---It's mainly used in the fields of recycling PVC, including foam pvc, pvc profiles, pipes, sheets. It can also be used to grind EPS, WPC, wood and so on.

Advantages:

- (1) It is energy-saving. Compared with similar grinders, its output is greatly improved (increased by 20%-50%) under the same power.
- (2) Dust collector is assembled to reduce dust pollution effectively.
- (3) The door cover of the host can be opened conveniently to maintain and replace cutters.

■ **MF SERIES DISC TYPE PLASTIC PULVERIZER**---It's widely applied to grind polyethylene (PE, including LLDPE, LDPE, MDPE, HDPE), soft PVC, propene polymer (PP), polystyrene (PS), ABS, Nylon (PA), EVA, PET, PC and so on. It's the most popular model among our customers, with disc diameter ranging from 350-800mm.

Advantages:

- (1) Low energy consumption and high throughput
- (2) Regrinding coarse powder automatically
- (3) Dual cooling system.
- (4) Safe and simple adjustment of cutting gap.

On the basis of MF series, we developed new product--MDP series.

Equipped with swing screen, it could be handle finer powder.

■ **CRYOGENIC MILL MACHINE**---It's used for various materials which can't be shattered in room temperature, For example: nylon, polyester, polypropylene and polyethylene, thermoplastic elastomer TPU, TPEE, PA, copolymerization of nylon, polyester, Polytetrafluoroethylene, EVA, food industry (chili powder), Chinese herb and so on.

Features:

The pulverized powder size can reach to 700 mesh. In the process of pulverizing, a closed loop system is formed by cold source, which makes full use of energy and energy saving. Moreover, using liquid nitrogen as medium achieves realize the function of ultra-low temperature pulverizing, avoid the explosion and oxidation. The cold medium temperature can be adjusted according to the brittleness point of materials, and it can be cooled to -196 C at most.

ZHANGJIAGANG FENGDA KAILAI MOULD CO.,LTD

China pioneer Manufactory for IBM machine&molds

- Zhangjiagang Feng Da Kai Lai Mould Co.,Ltd is located in National Clean & Civilized City,Zhangjiang,Jiangsu, having more than 10years experienced working team.The area of it is 1,800 square meters.Adjacent to Shanghai in the east.enjoying superior geographic location and convenient transportation.
- We specialized in One step injection blow molding machine,suitable for PE/PP/PS etc materials,making kinds of plastic bottles from volume 1.5ml to 1000ml,with exacting weight,size volume tolerance and quality.It produces more finished bottles per cycle without deflashing and trimming.IBM is used widely in pharmaceutical,cosmetic,food etc chemical packaging field.
- With experienced technicians in plastic mold development and rich experience in theory and practice,we can provide thoughtful service for customer investment plan.Having advanced technology in injection blow mold design,we can provide mold supporting service for every manufacturer for his automatic three-working-position injection blow molding machines with all brands(WHEATON,JOMAR,Uniloy etc.) Zhangjiagang Feng Da Kai Lai make reliable and economical IBM machines&mold and develop together with you.

Energy-efficient stretch blow molding technology for your PET bottles

Reduced energy consumption helps you conserve resources
Excellent process stability, especially for your light-weight bottles
Low-maintenance design for maximum machine availability

Brief Introduction

- Taizhou Huangyan Baixing Plastic Machinery Factory is specialized in developing and manufacturing PET stretch blow moulding machines and blowing moulds. We have many years experience of researching and producing blow moulding machines. Our main products are: BX series full automatic machines, hand feeding and Semi-automatic blow moulding machines with all kinds and sizes of moulds. The main parts of The machines are from Germany, Japan, Switzerland, Korea, Taiwan and so on, They can make 10ml-25L bottles and barrels and jars with different designs and shapes. Our machines are sold to Philippines, Malaysia, Indonesia, Iraq, Syria, Nigeria, Pakistan, Mexico, Paraguay, Peru, Russia and many other countries and regions.
- To produce machines with the best quality and simple operation and with the best price is the aim for Baixing Machinery to strive for.
- 台州市黄岩百星塑料机械厂是一家专业制造和开发PET吹瓶机及吹瓶模具于一体的公司，本公司从事吹瓶行业已有多年历史。目前百星机械主要产品有：BX系列全自动，手动和半自动二步法吹瓶机以及各种形状与规格的吹瓶模具。主要的机器零部件均选用德国，日本，瑞士，韩国和台湾等国际知名产品。BX系列吹瓶机可以生产10ml-25L等各种形状的PET塑料瓶/桶/罐，产品远销菲律宾、马来西亚、印度尼西亚、伊拉克、叙利亚、巴基斯坦、尼日利亚、墨西哥、巴拉圭、秘鲁、俄罗斯等国家和地区。
- 为客户制造出性能优良、稳定耐用、操作简便、价格实惠的二步法中空成型机是百星机械努力奋斗的目标。

About us

NINGBO BEILUN FULLY MACHINERY CO., LTD. is located in NingBo BeiLun district, ZheJiang province, near to NingBo port. The company is specialized in developing, producing and merchandising plastic injection molding machines.
Currently there are four series of injection molding machines -- solar, luner, lightning, and aurora. Fully machinery is featured by reliability, efficiency, precision, and energy saving, by applying industry advanced design, components, and control system.
Fully machinery is well known in domestic market, and export across countries in south america, south asia, south east asia, middle east asia, east europe, and africa. It is now recognized by our customers as a professional manufacturer with excellent quality, competitive price, and reliable services.
Striving for excellence and offering customized injection molding solution is our company vision. we welcome your valuable inputs for our sustainable growth.

GH Lightning series high speed injection molding machine is specially designed for thin-will and IML projects with high injection speed, short cycle-time, energy-saving, stable and perfect molding.

光华(GH)系列是针对目前市场上需求广泛的超薄食品容器和餐具、医疗产品、导光板、记忆卡、深腔成型、模内贴标IML等制品, 所研发的具有注射速度快、成型周期短、耗电量少、稳定性高等特点的薄壁高速专用注塑机。

NANJING ZHUO-YUE EXTRUDERS CO.LTD

About us:

NanJing Zhuo-Yue Extruders Co.Ltd established in 2011. Our company is a professional manufacturer and exporter of Twin Screw Compounding Extruder. We specialized in the processing and marketing of mechanical equipment and parts, meanwhile, we also self-employed and agents of all types of goods and technology import and export business. We have over 50 employees, an annual sales figure that exceeds USD 1.5 million and are currently exporting 80 percent of our production worldwide. In virtue of our high quality products and outstanding customer service, we have gained a global sales network reaching Southeast Asian countries. Cooperated to achieve excellence.

专业生产制造/Professional Manufacturer For :

- 平行同向三螺杆挤出机
Co-rotating Parallel Mult-screw Extruder
- 平行同向双螺杆挤出机
Co-rotating Parallel Twin-screw Extruder

- 此系列机型采用同向平行组合式的三螺杆结构，实现在较小的螺杆长径比条件下就能达到传统双螺杆挤出机在较大长径比才能达到的混炼混合效果，具有独特的高填充、高分散、高产量、低能耗优势。
- This series of models adopt co-rotating parallel tri-screw extruder structure, under the condition of small LD ratio, the mixing effect can be achieved the same as traditional two-screw extruder under the large LD ratio. It has unique advantages of high filling, high dispersion, high yield and low energy consumption.

HY-3021
Plastic positive and negative thermoforming machine

HY-3021 plastic positive and negative thermoforming machine
It is suitable for BOPS, HIPS, PP, PET, PS, PVC sheet material to produce high transparency, high tensile turn-up and flat products, such as: food box, bowl, plate, lid, trays for daily necessities, medicine and drugs, wine, electrical parts and etc.
The produce process: sheet roll--forming--cutting--stacking--products
1. Forming area : 760 x 540 mm
2. Forming depth : 120mm
3. Sheet thickness range: 0.20-1.5mm
4. Dimensions (L x W x H): 9200 x 2330 x 2900 mm
5. Weight : 8500kg

HY-51/62
Fully-automatic plastic thermoforming machine

HY-51/62 Fully-automatic plastic thermoforming machine
It's available for BOPS, HIPS, PS, PVC, PET plastic sheet roll forming into various of containers, boxes, dishes, trays, bowls and lids.
The produce process: sheet roll--forming--cutting--stacking--products
1. Forming area : 510 x 620mm
2. Forming depth : 100mm
3. Sheet thickness range: 0.10-1mm
4. Dimensions (L x W x H): 2750 x 1410 x 2350 mm
5. Weight : 2500kg

HY-61/62B
Semi-automatic plastic thermoforming machine

HY-61/62 Semi-automatic plastic thermoforming machine
It's available for BOPS, HIPS, PS, PVC, PET plastic sheet roll forming into various of containers, boxes, dishes, trays, bowls and lids.
The produce process: sheet roll--forming--cutting
1. Forming area : 610 x 620mm
2. Forming depth: 100mm
3. Sheet thickness range 0.10-1mm
4. Dimensions (L x W x H): 4410 x 1290 x 2130 mm
5. Weight : 2000kg

Accumulation of 25 years experience. ■
Born to be perfect.

Over-molding solution for municipal pipe connection

■ Suitable for most municipal water supply and drainage pipe connections

■ Overmolding-the most reliable solution for large pipe socketing

Large diameter fitting molds

Compared with welding and expanding socketing, overmolded connection has better ring stiffness. Spigot-socket design offers more convenient installation at construction site. Our overmolding mold+high volume injection unit can inject the spigot/socket/flange from DN300 to DN1200, minimizing your investment and making your pipes more competitive.

■ As macromolecule resin, the product of PE is easily to have big deformation and warping. Based on data accumulation of different fitting types and sizes, we provides interchangeable solutions for all large PE fittings and municipal manholes. EMTECH owns 1500t and 2500t injection machines for mold test and pilot production.
